

Name: _____

A Pretty Flower

They can be more than 15 feet tall. Their heads can be a foot wide. They can have more than 1,000 seeds. They are bright yellow. What are they? They are sunflowers!

Sunflowers look like small suns. They also turn to face the sun! Sunflowers face east in the morning. That's where the sun rises. Their heads move as the sun moves in the sky.

Sunflowers stop tracking the sun when they get old. They also stop in the fall. In the fall they are too heavy with seeds.
